DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 13 May 2008 has been entered.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

3. Claims 9 and 11-17 are allowed over prior arts.
4. The following is an Examiner's statement of reasons for allowance:

With regards to Claim 9, the prior arts of record fail to anticipate and/or render obvious, either solely or in combination, an image sensor comprising, among other features, a structure for directing photosensitive charges of columns terminating opposite beveled corners to register stages situated in the oblique parts alongside the beveled corners, said structure comprising insulating zones extending between adjacent columns of a matrix, parallel to said columns, wherein insulating zones which terminate on a beveled part of the register have terminal portions bent towards said beveled part.

With regards to Claim 17, the prior arts of record fail to anticipate and/or render obvious, either solely or in combination, an image sensor comprising, among other features, a

structure for directing photosensitive charges of columns terminating opposite beveled corners to register stages situated in oblique parts alongside the beveled corners; wherein each row of a matrix comprises several electrodes extending in a linear strip and in that the ends of certain of these electrodes are bent so that, inside a column terminating on an oblique part of the register, the last electrode of the last row of this column extends parallel to the beveled corner, the electrodes which precede this electrode having shapes intermediate between an oblique strip shape and a horizontal strip shape so as to facilitate the transmission of charges under these electrodes from the column to the register.

Claims 11-16 are allowed at least by virtue of their respective dependency upon an allowable base claim.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
